(54) REFLECTION TYPE SCREEN AND ITS PRODUCTION

(57)Abstract:

PURPOSE: To improve the contrast of an image, to simultaneously improve screen reflection characteristics, and to clearly observe a projected image even in a bright room.

CONSTITUTION: As to a reflection type screen in which the image is projected from a projector, and which is used when the image is observed from the same direction as that of the projector, a reflecting layer 12 is provided on the nearly hemispheric part of a transparent and achromatic bead 11 having a specified refractive index in a state where it is on a back surface on a projecting side, and the beads are plurally transferred or bonded on a screen base material 13.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
